

SUBMISSION GUIDELINES

The basis for acceptance of papers is that they must be relevant and contribute to the current literature of OPEX topics, Quality Management, Continuous Improvement, and Total Quality Management. Authors are invited to submit an extended abstract of 300 words through the conference submission system. All conference abstracts will be double-blind reviewed by members of a Scientific Committee to ensure their academic rigor, practical significance to industrial arena and value to existing literature.

Each abstract should have a separate title page that includes the title of the paper, author name/s, affiliation/s and full contact details including address, fax, phone and e-mail. Your abstract must include up to 5 key words that capture the contents of the paper. For multiple authors, please indicate clearly to whom correspondence should be made. Authors must register for and attend the conference if their submission is accepted. We do not encourage “no shows” or “requests for online presentations”, etc. We encourage electronic mail submission in Microsoft Word. Please note that we strongly suggest all authors follow structured abstract. Please click the link below for guidance in preparing a structured abstract.

<https://www.emeraldgrouppublishing.com/how-to/authoring-editing-reviewing/write-article-abstract>

When an abstract is accepted, the authors are encouraged to submit the full paper. Full Papers should be typed on standard A4 pages using 12-point Times New Roman typeface or equivalent in MS Word. Final Manuscripts **should be limited to 3000-3500 words in length, double-spaced with double-space between paragraphs**. Authors’ names, affiliations and e- mail address should be provided after the title. The title should be bold-faced and centered in upper/lower case. Figures and Tables should be sized to scale and labelled with a caption centered under the Figure or Table. It is preferable to have the figures and tables included in the text but if this is not possible, please place all Figures and Tables at the end of the text (after References) and ensure that a place-mark is inserted in the body of the text (e.g.: “Insert Figure 1 here” or “Insert Table 1 here”). It is strongly advised to use Harvard style of reference throughout the paper.

Here are some examples:

For books:

Phadke, M.S. (1989), Quality Engineering Using Robust Design, Prentice-Hall International, Englewood Cliffs, NJ

For book chapters:

Bessley, M. and Wilson, P. (1999), Marketing for the Production Manager, in Levicki (Ed.), Taking the Blinkers off Managers, Broom Reim, London, pp. 29-33.

For journal articles:

Montgomery, D.C. (1992), The Use of Statistical Process Control and Design of Experiments in product and process improvement, IIE Transactions, Vol.24, No.5, pp. 4-17.

All final accepted abstracts will be published in the Electronic Conference Proceedings with an ISBN number. The organizing committee and technical committee members will encourage selected authors to submit their extended papers for review and publication to a special issue in one of the Emerald Journals (e.g.: International Journal of Quality and Reliability Management or International Journal of Lean Six Sigma) or for an edited book. Details regarding the same will be made available closer to the conference dates. Selected papers will be eligible for best awards.
