Advanced Financial Statement Analysis For Decision Making

November 28 -30,
2024 | IIMK

February March April

Overview:

: Financial statements provide substantial financial information about firms to users while making equity investment decision, credit decision, bond rating decision and several other corporate decisions. While preparing these statements managers, auditors and regulators play vital role to improve the quality of presentation. But recent corporate failures, misuse of accounting judgments and accounting scandals at national and international level resulted huge loss to retail investors, institutional investors, bankers and public. This makes all the users of financial statements to have thorough understanding of various ways and approaches of financial statement analysis with the help of traditional and advanced techniques from multiple perspectives.

The aim of this Programme is to enhance financial statement users' understanding of financial reporting and financial statement analysis in order to facilitate in effective decision making. It helps in examining the impact of the differential application of accounting methods and estimates on financial statements, with particular focus on the effect of accounting choices on reported earnings, net worth, cash flow, liquidity and various measures of corporate performance including ratios.
