Programme Director's Message

The strategy development process in organisations necessitates the involvement of managers from all functional areas. The success of this holistic process largely depends upon the contributions made by the managers for developing effective strategies. Research in the field of strategic management has evolved significantly over the years, and the research findings have been translated into practical prescriptions that are useful for managers. Based on these prescriptions, many tools and frameworks used for conducting various strategic analysis have been developed. This programme introduces the necessary tools and frameworks to the participants and provides them with an opportunity to conduct strategic analyses in different contexts. The whole programme is entirely hands-on with the primary objective of providing the required knowledge and skills to the participants for developing their ability to think strategically and to make vital strategic decisions. Many cases based on different industries and decision-making scenarios will be discussed in this programme. These case discussions are very helpful in enhancing strategic thinking skills. A capstone project included in the programme provides an opportunity to apply the critical strategic concepts to tackle major management issues faced by organisations. A strategy simulation included in this programme provides an opportunity for the participants to make critical strategic decisions in a virtual environment. The simulation helps the participants to sharpen their strategic decision-making skills.
